Preface

Dear neighbors,

The country is opening up and we can now enjoy the cultural sector, the gyms and restaurants again. Many of us are planning vacations and trips. Fortunately, the quarantine measures for schools have also been relaxed. We are very content with these easing measures, despite the risks and uncertainties. The board of the neighborhood association hopes you all got through this time well. We are going to organize the annual GMM again on April 29 in the Warenar and hope to see you there in large numbers. Then afterwards we can raise a glass to everyone's health. You will receive a reminder by email. We hope to see you then!

Warm regards,

Board Neighborhood Association Burgwey

Contribution

The contribution for the association year 2021 was announced in the newsletter of December 2020. That turned out not to have been clear, we apologize for that. After sending payment reminders, many members have paid the membership fee. For the contribution of 2022 you will receive a separate email in the first quarter with a clear request to pay the contribution.

Appgroups

If you want to use a babysitter as a parent or if you want to babysit neighborhood children, join the 'Babysitting in de Burgwey!' app group. This app group includes both parents who are looking for a babysitter, as well as the babysitters from the neighborhood. Are you looking for a babysitter? Then you app your request in this group. And if you can babysit on that date, then there is a match! You can register for this via buurtvereniging@burgwey.nl.

Waste

At the beginning of this year, the municipality of Wassenaar removed all Plastic Metal and Beverage Packages (PMD) containers. This is because residents are allowed to throw PMD and residual waste in one bin from January. The residual waste bin is therefore emptied weekly. From this year on, the green waste will be collected once every 2 weeks. Note: The bin will not be emptied more frequently in the spring and autumn. You can request an extra green waste bin from the municipality for €50 if needed.

Adjusted frequency green waste bin

Groene Meent

We would like to point out the residents' initiative of the Groene Meent. An initiative: from and by Wassenaarders. These volunteers want to make greening easy and accessible for everyone in Wassenaar. As a result, they, together with the municipality, organize various activities in which everyone can participate with the aim of increasing sustainability. More information can be found on our website::

www.burgwey.nl/nieuwsbrieven-buurtvereniging-burgwey/

Residents' initiative de Groene Meent

Traffic

A lot has happened in the field of traffic in Wassenaar in recent months. Emotions ran high. On December 14, the city council finally decided that the downgrade of (only)

Jagerslaan to a 30 km road will be removed from the new plan and integrated into a new and broader study into the possibility of introducing a 30 km speed limit. For the whole of Wassenaar (or around the center, eg from north to Papagaaienlaan) in imitation of other cities and national policy. The alderman will come up with an action plan for the new investigation before March 1st 2022. This investigation must be completed by September 1st and presented to the council.

The project Renovation of the Prinsenweg will also start in 2022. The intention is to provide the road with low-noise asphalt and also to make it safer for cyclists and pedestrians. The start of work at the end of 2022/beginning of 2023 must be taken into account. The project is radical and will last approximately one year.

Zorgcampus 2

We have previously informed you that we as a board have expressed our concerns and have drawn attention to the future parking and traffic problems surrounding the new building, but unfortunately without result. The objections submitted by local residents have been rejected. The intended date to start the demolition is early March 2022. The demolition will take approximately 4 to 5 months. Ad Hoc's management of this location will stop at the end of February and the location will then be completely fenced off. The street behind "het Elzenlaantje" is closed for safety.

In the second half of February, the Hanselman expert bureau will be recording immediately surrounding homes. The homes that qualify for this will receive a letter. The contractor who will carry out the demolition is Knijnenburg from The Hague. This contractor also demolished the first phase at the time. The existing entrance on Poortlaan is used for cars belonging to employees of the demolition company. The existing entrance on Ridderlaan is used for heavier construction traffic.

The supply and discharge route for heavy traffic will be Rijksstraatweg > Lange Kerkdam > Prinsenweg > Van Zuylen van Nijveldstraat > Storm van S-Gravensandeweg > Ridderlaan and vice versa. Points of attention that we have

given to the demolition contractor, among other things, is bringing children from the Montessori school to the Zanderijpad.

Proposed new construction Zorgcampus 2

Fonds Wassenaar

Fonds Wassenaar is a foundation that aims to promote the well-being of vulnerable people and is committed to the quality of life in Wassenaar. An application can be submitted to Fonds Wassenaar to support local initiatives. In our neighbourhood, for example, flower bulbs were planted in various places in the autumn of 2020. If you have an idea to improve the quality of life in our neighbourhood, let us know and we can investigate whether your idea can possibly be implemented. For more information see the website www.fondswassenaar.nl

Warenar

In January 2020, the city council gave the order to retain the theater De Warenar and to add the village hall function to it, to make the building more sustainable and to conduct a feasibility study into adding homes.

The parish has entered into a letter of intent with the municipality of Wassenaar and the Beheer Warenar foundation to further develop the sale of the property and the development of homes.

On July 9th 2021, the Diocese of Rotterdam has authorized the parish to sign the letter of intent and to continue the process for the sale of De Warenar. The building will retain a social and cultural interpretation in the future. The parish has also expressly included in the letter of intent that a parish hall be realized at the De Warenar building, for which it is being investigated to what extent the residential

house of Heeckerenstraat 9 is suitable for this or can be expanded.

In this process, the municipality will mainly test to what extent the added and existing functions in and around the De Warenar building remain in proportion to the monumental character of the building and its surroundings. More information can be found at www.wassenaar.nl/herontwikkeling-warenar en www.parochie-augustinus.nl/blog/2021/08/meer-duidelijkheid-toekomst-warenar

Website

The neighborhood association has recently launched a new website: www.burgwey.nl. This website (for now only available in Dutch) will become an interactive platform where all information about the neighborhood and the neighborhood association will be found. We would like to invite you all to visit the website and give your opinion on this to the board. This can be done by email or via the new contact form on the website: <https://burgwey.nl/contact/>.

All tips, ideas for fun competitions, events etc are very welcome!
